AICCU Institutions Fostering the STEM and Health Workforce

The Campaign for College Opportunity recently released its report *Needed: Sy(STEM)ic Response-How California's Public Colleges and Universities are Key to Strengthening the STEM and Health Workforce*. While AICCU agrees that the public sector of higher education is critical to strengthening the STEM and Health Workforce, AICCU institutions are also needed as part of the solution.

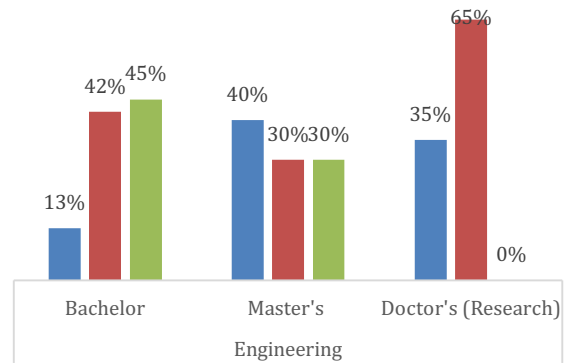

AICCU institutions offer a wide range of academic programs. In fact, 44 institutions offer undergraduate biological science programs; 8 offer pre-dentistry; 34 offer undergraduate health sciences; 15 offer undergraduate kinesiology; 11 offer undergraduate (pre-)medicine; 13 offer undergraduate nursing; 8 offer per-pharmacy; and 7 offer undergraduate physical therapy.

Among the 4-year institutions in California, AICCU members contribute to the completion of STEM and Health Profession degrees.
