

Keeping the Promise of STEM Degrees

Science, Technology, Engineering, and Math (STEM) degrees are an important key to the future of California's workforce. Among the 4-year institutions, independent California colleges and universities (ICCU) strongly contribute to the completion of STEM degrees in the state.

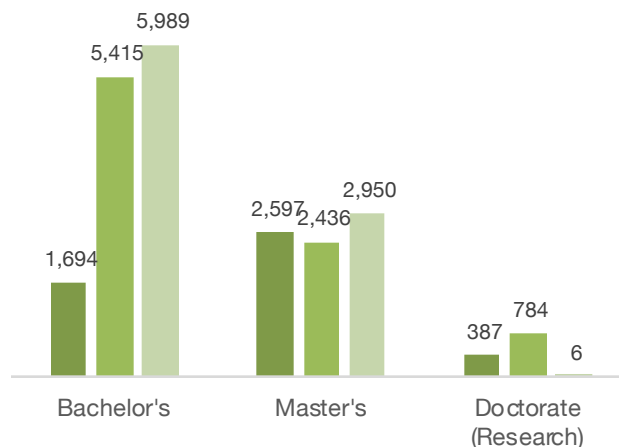

Biological & Biomedical Sciences

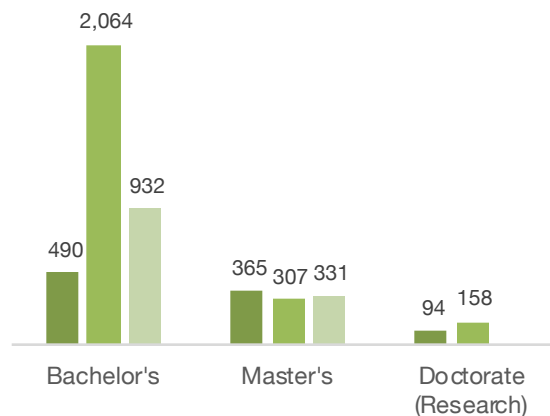

Computer & Information Sciences

Engineering

Mathematics & Statistics

Dedicated to providing higher education access and opportunity, ICCU institutions are graduating and producing the educated workforce California needs to thrive.
